

MATTHEW BOWYER

Analytics & Data Science Manager | Applied AI & Machine Learning

Gauteng, South Africa | +27 72 184 8709 | matthewmbowyer@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Analytics and Data Science Manager with 7+ years of experience across analytics, business intelligence, financial analysis, data science, machine learning and reporting automation. Leads global analytics, data science and applied AI delivery across 29 countries, with regular engagement with C-suite leadership. Combines leadership with hands-on delivery across Python, SQL, predictive and prescriptive analytics, statistical modelling, feature engineering, MLOps and GenAI. Proven track record of productionising analytical workflows, governing reusable data and ML assets, and delivering decision support across millions of devices, SIMs and customer records.

CORE CAPABILITIES

Leadership & Strategy Analytics strategy • Data strategy • AI/ML capability building • Executive decision support • Stakeholder management • Cross-functional delivery • Mentoring

Data Science & AI Python • SQL • Machine learning • Statistical modelling • Predictive & prescriptive analytics • Decision science • Optimisation • Feature engineering & selection • Experimentation • Hypothesis testing • Model validation • Tuning • Calibration • Performance benchmarking • GenAI • LLMs • RAG • VLMs

Engineering & Platforms Databricks • MLflow • Spark • PySpark • Delta Lake • Feature Store • MLOps • ETL/ELT • Data pipelines • Data modelling • Model monitoring & drift • Data/model governance • Data quality • Lineage • AWS • MySQL • Tableau

PROFESSIONAL EXPERIENCE

Manager: Data Analytics & Global Reporting

Jun 2024 - Present | South Africa

Cartrack

Lead global analytics, reporting automation, data science, machine learning and applied AI delivery across 29 countries and major business functions including sales, finance, marketing, operations, telematics and R&D.

- Lead and develop multidisciplinary analytics, data science, Python/software and AI capability while remaining hands-on in technical delivery.
- Partner directly with senior leadership, primarily the COO as well as the CFO and CTO, translating strategic and operational priorities into analytical and AI initiatives.
- Lead predictive and prescriptive analytics, forecasting, anomaly detection, statistical modelling, optimisation and decision-support across datasets spanning millions of devices, SIMs and customer records.
- Design reusable Python/SQL data pipelines and feature-engineering workflows with data modelling, feature selection, quality controls, lineage and governance supporting scalable analytical and ML use cases.
- Own ML lifecycle activities including experimentation, hypothesis testing, model validation, tuning, calibration, challenger analysis, performance benchmarking and model monitoring/drift analysis.
- Productionise business-critical analytics and ML workflows, replacing multi-day manual processes with unattended execution and applying MLOps practices across deployment, monitoring, documentation and continuous improvement.
- Lead applied AI initiatives including an internal LLM/RAG assistant for knowledge retrieval, code assistance and workflow automation, plus VLM-based visual validation of AI camera outputs and fitment/installation quality.

SIM Usage Analyst

Jan 2024 - May 2024 | South Africa

Cartrack

Analysed global SIM usage, device health, firmware performance and operational trends across Cartrack's international fleet, using large operational datasets to support issue prioritisation and decision-making.

- Performed exploratory analysis, anomaly detection and trend analysis across global usage and device-performance data.
- Improved visibility into fleet, connectivity and device health through repeatable analytical reporting and data-quality checks.
- Partnered with operational teams to translate findings into prioritised actions and performance improvements.

PROFESSIONAL EXPERIENCE

Data Scientist

Mar 2023 - Jan 2024 | South Africa

Greendoor Group

Led analytics, data science and machine learning initiatives across Greendoor Group and its African subsidiaries, supporting operational, financial, fleet and executive decision-making.

- Built predictive and prescriptive models and production-oriented analytical solutions using Python, MySQL, Tableau and AWS-based data pipelines.
- Performed exploratory data analysis, statistical analysis and hypothesis testing, with feature engineering and selection, model validation, tuning, calibration and performance benchmarking.
- Developed reusable ETL/ELT pipelines, data models and governed analytical assets with data-quality, documentation and lineage controls.

- Applied model monitoring, governance and decision-science practices to translate model outputs into reliable operational and financial recommendations.
- Partnered directly with senior leadership, including the CTO, and supported teams across African subsidiaries with analytics, reporting, training and process improvement.

Data Analyst

Jan 2019 - Feb 2023 | Gauteng, South Africa

Smith Yong and Associates

Supported audit, financial analysis, inventory verification and data quality initiatives through structured reporting and analysis.

- Analysed financial and operational records to support audit and business review processes.
- Led physical inventory verifications, helping ensure accurate stock and asset reporting.
- Cleaned, validated and improved datasets to support reliable analysis and decision-making.

EDUCATION

Master of Science (MSc), Data Science

Jan 2024 - Jun 2026 | Merit

University of Essex Online

Thesis: A Multimodal Driver Behaviour Evaluation System: Combining Telematics, VLMs and LLMs

Bachelor of Science (BSc), Data Science

Mar 2020 - Jul 2023

The Open University

LEADERSHIP & ADDITIONAL ACHIEVEMENTS

Vice Chairman & Athlete Representative

Feb 2025 - Present

Gauteng Weightlifting Association

- Elected to represent athlete interests and work with the association executive on athlete development, competition planning and strategic improvements.
- Serve as a liaison with the South African Weightlifting Federation and support broader initiatives across the weightlifting community.

Executive Committee Member

Jul 2023 - Feb 2025

Gauteng Weightlifting Association

- Initiated and managed automated tracking and uploading of technical official statistics, improving the timeliness and accuracy of federation records.
- Supported automation of athlete and event record tracking, website maintenance and technical operations.

South African Presidents Team Representative

2019

RLSS Commonwealth Festival of Lifesaving

- Represented South Africa in Leeds, UK; won an individual silver medal with a provincial record and contributed to two team medal finishes.
